

### SUMMARY

Aspen Pharmaceuticals uses the SADE SP140 for statistical profiling to achieve greater quality controls in tablet manufacturing.

### CUSTOMER

Aspen Australia commenced operations in May 2001 and is one of the largest pharmaceutical companies in Australia. Their product portfolio includes some of the most prescribed brands in Australia covering most disease states.

### CHALLENGE

- Greater quality control in tablet manufacturing
- Versatile to handle both tablets and capsules from size 0-3
- Flexible performance for batch sizes that varies from 5,000 to 1,000,000

### SOLUTION

The reporting function from SADE SP140 helped with the statistical profile of the manufacturing process and recovered product from development batches.

### OUTCOME

"CI Precision's professionalism, delivery and product lived up to expectation."

“

*support from CI  
was excellent*

”
