

SUMMARY

The SADE SP240 tablet and capsule weight sorter is used at Synthon Chile for specific markets that require additional quality verifications and for Internal Positive Controls.

CUSTOMER

Synthon has been established in Lampa, Chile, since 2012 and is the only manufacturing plant in Chile with high containment technology and certified by the European Medicines Agency to export to Europe.

CHALLENGE

- Specific markets require additional quality verifications
- Help with Internal Positive Control (IPC)

SOLUTION

A floor standing weight sorter/checkweigher unit, the SADE SP240 is optimised for medium sized batches, and is ideal for ensuring weight consistency and quality verification.

OUTCOME

“(The SADE SP240) performs well, good quality and simple to use. We had a good experience with the installation, especially with initial training of our operators ”
