

SUMMARY

Ci-DMS MES (Manufacturing Execution System) has made significant savings in ensuring quality control and eliminating QC checking.

CUSTOMER

The world's largest manufacturer of OTC & healthcare medicines

CHALLENGE

- Reduce manufacturing overhead
- Improve stock control and visibility
- Deliver higher quality customer audits

SOLUTION

- Ci-DMS Implemented across 3 dispensing booths with 2 Supervisory Terminals
- CI Precision provided solution design, validation consultancy and user training
- The project involved personnel from Production, Quality, Validation, IT & Engineering
- Ci-DMS was integrated with the in-house ERP System

OUTCOME

- The project was completed within an agreed 5 month timeframe
- ROI achieved within nine months
- There have been two subsequent projects (changing ERP to SAP)
- Joint discussions to roll-out Ci-DMS globally

“Ci-DMS is a validated system that saves time and money”
